

GOGREEN CLIMATE PROTECTION PROJECT:

# LANDFILL PROJECT, SANTA MARTA, CHILE

## Project description

The project “Santa Marta Landfill Gas (LFG) Capture for Electricity Generation Project” is a landfill gas to energy project developed by Consorcio Santa Marta S.A. The proposed activity involves the collection and utilization of the LFG for generation of electricity. Santa Marta landfill is an existing and operational landfill site. It is located 17 km south of Santiago city and started its operation in 2002. It is one of the most important landfills in the region, serves a population of around 1,200,000 inhabitants corresponding to the southern communes of Santiago.

## PROJECT: LANDFILL PROJECT, SANTA MARTA, CHILE

<b>Project standard</b>	Goldstandard VER 3976
<b>Project type</b>	Biogas – Electricity
<b>Technology focus</b>	Landfill Gas
<b>Location</b>	Chile
<b>Project scale</b>	Large
<b>Supported SDGs</b>	3, 4, 7, 8, 9, 13
